**ANNAMACHARYA INSTITUTE OF TECHNOLOGY AND SCIENCES RAJAMPET**  
(An Autonomous Institution)

**Title of the Course** Algebra and Calculus  
**Category** BSC  
**Course Code** 20AC11T

**Year** I B. Tech.  
**Semester** I Semester  
**Branch** CE, EEE, ME, ECE, CSE and AI & DS

<b>Lecture Hours</b>	<b>Tutorial Hours</b>	<b>Practice Hours</b>	<b>Credits</b>
3	0	0	3

**Course Objectives:**

- This course will illuminate the students in the concepts of calculus and linear algebra
- To equip the students with standard concepts and tools at an intermediate to advanced level mathematics to develop the confidence and ability among the students to handle various real world problems and their applications

**Unit 1 Matrices 10**

Rank of a matrix by echelon form, Normal form, Solving system of homogeneous and non-homogeneous linear equations, Eigen values and Eigen vectors and their properties.

**Learning Outcomes:** At the end of the unit, the student will be able to:

- find the rank, Eigen values and Eigen vectors of a matrix (L1)
- solve systems of linear equations (L3)

**Unit 2 Quadratic forms of matrices 8**

Cayley-Hamilton theorem (without proof), Finding inverse and power of a matrix by Cayley-Hamilton theorem, Diagonalization of a matrix, Quadratic forms and nature of the quadratic forms, Reduction of quadratic form to canonical form by orthogonal transformation.

**Learning Outcomes:** At the end of the unit, the student will be able to:

- apply Cayley-Hamilton theorem to find inverse and power of a matrix (L3)
- identify special properties of a matrix, such as positive definite, etc., and use this information to facilitate the calculation of matrix characteristics (L3)

**Unit 3 Mean Value Theorems & Multivariable calculus 10**

Taylor's theorem and Maclaurin's theorem (without proofs) – Simple problems.

Partial derivatives, total derivatives, chain rule, change of variables, Jacobian, maxima and minima of functions of two variables, method of Lagrange multipliers for three variables.

**Learning Outcomes:** At the end of the unit, the student will be able to:

- translate the given function as series of Taylor's and Maclaurin's (L2)
- find partial derivatives numerically and symbolically and use them to analyze and interpret the way a function varies, and utilize Jacobian of a coordinate transformation to deal with the problems in change of variables (L3)
- acquire the Knowledge of maxima and minima of functions of several variables (L1)

**Unit 4 Multiple Integrals 8**

Double integrals, change of order of integration, change of variables (Cartesian to polar), areas enclosed by plane curves, evaluation of triple integrals.

**Learning Outcomes:** At the end of the unit, the student will be able to:

- extend the definite integral to double and triple integrals in cartesian and polar coordinates (L2)

- apply double integration techniques in evaluating areas bounded by region (L3)

### Unit 5 Special Functions

8

Beta and Gamma functions and their properties, relation between beta and gamma functions, evaluation of definite integrals using beta and gamma functions.

**Learning Outcomes:** At the end of the unit, the student will be able to:

- understand the properties of beta and gamma functions and its relations (L2)
- utilize the special functions in evaluating definite integrals (L3)

#### Prescribed Textbooks:

1. B. S. Grewal, Higher Engineering Mathematics, 44/e, Khanna Publishers, 2017.
2. Erwin Kreyszig, Advanced Engineering Mathematics, 10/e, John Wiley & Sons, 2011.

#### Reference Books:

1. B. V. Ramana, Higher Engineering Mathematics, Mc Graw Hill Education.
2. George B. Thomas, Maurice D. Weir and Joel Hass, Thomas Calculus, 13/e, Pearson Publishers, 2013.
3. R.L. Garg Nishu Gupta, Engineering Mathematics Volumes-I &II, Pearson Education
4. H. K. Das, Er. Rajnish Verma, Higher Engineering Mathematics, S. Chand.

#### Course Outcomes:

At the end of the course, the student will be able to

Blooms Level  
of Learning

1. apply the knowledge to solve System of linear equations. L3
2. develop the use of matrix algebra techniques that is needed by engineers for practical applications L3
3. classify the functions of several variables which is useful in optimization L4
4. solve important tools of calculus in higher dimensions and be familiar with 2-dimensional, 3-dimensional coordinate systems L3
5. understand the properties of beta and gamma functions and its relations L2

#### CO-PO Mapping:

Lecture Hours	Tutorial Hours	Practice Hours	Credits
3	0	0	3

**Course Objectives:**

- To impart knowledge in basic concepts of wave optics, electromagnetic theory and fiber optics.
- To explain the significant concepts of dielectrics, magnetic materials, semiconductors and superconductors in the field of engineering and their potential applications.
- To familiarize the applications of nanomaterials relevant to engineering branches.

**Unit 1 Wave Optics 9**

Interference-Principle of Superposition-Interference of light- Conditions for sustained Interference -Interference in thin films (reflected light)-Newton's Rings-Determination of Wavelength- Engineering applications of interference.

Diffraction-Fraunhofer Diffraction-Single and double slit Diffraction -Diffraction Grating – Grating Spectrum - Determination of Wavelength-Engineering applications of diffraction.

Polarization-Polarization by double refraction-Nicol's Prism--Half wave and Quarter wave plate- Engineering applications of Polarization.

**Learning Outcomes:** At the end of the unit, the student will be able to:

- explain the need of coherent sources and conditions for sustained interference and illustrate the concept of polarization of light and its applications. (L2)
- identify engineering applications of interference including homodyne and heterodyne detection. (L3)
- analyze the differences between interference and diffraction and classify ordinary and extraordinary polarized light. (L4)

**Unit 2 Dielectric and Magnetic materials 11**

Introduction-Dielectric Polarization-Dielectric polarizability- Susceptibility and Dielectric constant- Types of polarizations: Electronic and Ionic (quantitative), Orientation polarizations (qualitative) -Frequency dependence of polarization- Lorentz (internal) field - Claussius -Mosotti equation-Applications of Dielectrics – ferroelectricity.

Introduction- Magnetic dipole moment-Magnetization-Magnetic susceptibility and permeability- Origin of permanent magnetic moment -Classification of Magnetic materials-Weiss domain theory of ferromagnetism (qualitative)-Hysteresis-soft and hard magnetic materials-Magnetic device applications (Magnetic bubble memory).

**Learning Outcomes:** At the end of the unit, the student will be able to:

- explain the concept of dielectric constant and polarization in dielectric materials. (L2)
- classify the magnetic materials based on susceptibility and their temperature dependence. (L2)
- apply the concept of magnetism and magnetic devices. (L3)

**Unit 3 Electromagnetic Waves and Fiber Optics 9**

Divergence and Curl of Electric and Magnetic Fields-Gauss theorem for divergence and stoke's theorem for curl- Maxwell's Equations (quantitative)- Electromagnetic wave propagation (non-conducting medium)- Poynting's Theorem.

Introduction to Optical Fibers-Total Internal Reflection-Critical angle of propagation-Acceptance angle - Numerical

## Electronics and Communication Engineering

Aperture-Classification of fibers based on Refractive index profile, modes (step index, Graded index optical fibers) – attenuation and losses in optical fibers-Block diagram of fiber optic communication- Medical Applications-Fiber optic Sensors.

**Learning Outcomes:** At the end of the unit, the student will be able to:

- Apply the Gauss' theorem for divergence and Stoke's theorem for curl. (L3)
- Apply electromagnetic wave propagation in different guided media. (L3)
- Classify optical fibers based on refractive index profile and mode of propagation and identify the applications of optical fibers in medical, communication and other fields. (L2)

### Unit 4 Semiconductors

8

Origin of energy bands - Classification of solids based on energy bands – Intrinsic semi-conductors - density of charge carriers-Fermi energy – Electrical conductivity - extrinsic semiconductors - P-type & N-type - Density of charge carriers - Dependence of Fermi energy on carrier concentration and temperature- Direct and Indirect band gap semiconductors-Hall effect- Hall coefficient - Applications of Hall effect - Drift and Diffusion currents – Einstein's relation - Applications of Semiconductors.

**Learning Outcomes:** At the end of the unit, the student will be able to:

- Outline the properties of n-type and p-type semiconductors and charge carriers. (L2)
- Interpret the direct and indirect band gap in semiconductors. (L2)
- Identify the type of semiconductor using Hall effect. (L2)

### Unit 5 Superconductors and Nano materials

8

Superconductors-Properties- Meissner's effect - Types of Superconductors - BCS Theory-Josephson effect (AC & DC)- Applications of superconductors.

Nano materials – significance of Nano scale - properties of nanomaterials: physical, mechanical, magnetic, Optical, Thermal - synthesis of nanomaterials: top-down - ball milling- Bottom-up - Chemical vapor deposition- characterization of nanomaterials: X-ray diffraction (XRD) - Scanning Electron Microscope (SEM) - Applications of Nano materials.

**Learning Outcomes:** At the end of the unit, the student will be able to:

- Explain how electrical resistivity of solids changes with temperature. (L2)
- Classify superconductors based on Meissner's effect. (L2)
- Apply the basic properties of nanomaterials in various engineering branches. (L3)

### Prescribed Textbooks:

1. M. N. Avadhanulu, P. G. Kshirsagar & T. V. S. Arunmurthy, A Textbook of Engineering Physics, S. Chand Publications, 11<sup>th</sup> edition, 2019
2. T Pradeep, A textbook of Nano Science and Nano Technology, Tata McGraw Hill, 2013
3. Charles Kittel, Introduction to Solid State Physics, Wiley Publications, 2011

### Reference Books:

1. David J. Griffiths, Introduction to Electrodynamics, 4/e, Pearson Education, 2014
2. K. Thyagarajan, Applied Physics, McGraw Hill Education (India) Private Ltd, 2019
3. Gerd Keiser, Optical Fiber Communications, 4/e, Tata Mc Graw Hill, 2008

### Course Outcomes:

At the end of the course, the student will be able to

Blooms Level of Learning

1. Explain the concepts of interference, diffraction and polarization and identify their applications in engineering field.
2. Summarize the various types of polarization of dielectrics, classification of magnetic materials and the applications of dielectric and magnetic materials.
3. Apply electromagnetic wave propagation in different guided media and Explain fiber optics concepts in various fields with working principle.
4. Outline the properties of various types of semiconductors and identify the behavior of

L2

## Electronics and Communication Engineering

<b>Title of the Course</b>	Problem Solving through C programming
<b>Category</b>	ES
<b>Course Code</b>	20A511T

<b>Year</b>	I B. Tech.
<b>Semester</b>	I Semester
<b>Branch</b>	CE, EEE, ME, ECE, CSE and AI&DS

**Credits**  
3

- Understanding the steps in problem solving and formulation of algorithms to problems.
- Develop programming skills as a means of implementing an algorithmic solution with appropriate control and data structures.
- Develop intuition to enable students to come up with creative approaches to problems.
- Develop programs using pointers, structures and unions
- Manipulation of text data using files

Steps to solve problems, algorithm, Pseudo code, Flowchart with examples, Program Development Environments.  
Introduction to programming: Programming languages and generations.

## Learning Outcomes

- Identify situations where computational methods and computers would be useful. (L2)
- Approach the programming tasks using techniques learned and write pseudo-code.(L2)
- Choose the right data representation formats based on the requirements of the problem. (L3)
- Write the program on a computer, edit, compile, debug, correct, recompile and run it.(L4)

Selective, looping and nested statements, jumping statements.

## Learning Outcomes

- Use the comparisons and limitations of the various programming constructs and choose the right one for the task in hand.(L3)
- Identify tasks in arrays with different techniques that are applicable and apply them to write programs. (L2)
- Design and implement operations on both single and Multidimensional arrays. (L4)

**Strings:** Declaration and Initialization, String Input / Output functions, String manipulation functions. **Functions:** Types of functions, recursion, scope of variables and storage classes.

## Learning Outcomes

- Implement and test the programs on strings using string manipulation functions. (L5)
- Analyze programming problems to choose when regular loops should be used and when recursion will produce a better program (L4)

**Pointers:** Understanding computer's memory, introduction to pointers, declaration pointer variables, pointer

arithmetic, pointers and strings, array of pointers, function pointers, dynamic memory allocation, advantages and drawbacks of pointers.

### Learning Outcomes

At the end of the unit, the student will be able to:

- Identify tasks in which the dynamic memory allocation techniques learned are applicable and apply them to write programs, and hence use computers effectively to solve the task. (L2)
- Design and develop Computer programs, analyzes, and interprets the concept of pointers and their usage. (L6)

## Unit 5 Structures and Files

9

**Structures:** Structure definition, initialization and accessing the members of a structure, nested structures, array of structures, structures and functions, structures and pointers, self-referential structures, unions and enumerated data types.

**Files:** Introduction to files, file operations, reading and writing data on files, error handling during file operations.

### Learning Outcomes

At the end of the unit, the student will be able to:

- Define derived data types and use them in simple data processing applications. (L2)
- Develop and test C programs for simple applications using files. (L5)

### Prescribed Text Books:

4. C Programming and Data Structures. B.A. Forouzan, R. F.Gilberg, Cengage learning, Indian edition.
5. C and Data Structures, E.Balaguruswamy, Tata McGraw Hill.
6. Programming in C and Data Structures, J.R.Hanly, Ashok N. Kamthane and A. Ananda Rao, Pearson Education.

### Reference Books:

4. LET US C, Yeswanth Kanitkar, Ninth Edition, BPB Publication
5. Byron Gottfried, Schaum's" Outline of Programming with C", McGraw-Hill.
6. Brian W. Kernighan and Dennis M. Ritchie, the C Programming Language, Prentice Hall of India.
7. A K Sharma "Computer Fundamentals and Programming", 2nd Edition, University Press, 2018.
8. PradeepDey and Manas Ghosh, "Programming in C", Oxford Press, 2<sup>nd</sup>Edition, 2017
9. ReemaTharaja "Introduction to C Programming", Second Edition, OXFORD Press, 2015

### Course Outcomes:

At the end of the course, the student will be able to

Blooms Level of Learning

- |  |    |
|--|----|
| 1. Formulate solutions to problems and represent those using algorithms/Flowcharts.  | L3 |
| 2. Choose proper control statements and use arrays for solving problems.   | L3 |
| 3. Decompose a problem into modules and use functions to implement the modules.  | L4 |
| 4. Apply and use allocation of memory for pointers and solve the problems related to manipulation of text data using files and structures. | L3 |
| 5. Develop the solutions for problems using C programming Language.  | L6 |

### CO-PO Mapping:

## Electronics and Communication Engineering

<b>Title of the Course</b>	Basic Electrical and Electronics Engineering
<b>Category</b>	ESC
<b>Couse Code</b>	20A411T

<b>Year</b>	I B.Tech.
<b>Semester</b>	I Semester
<b>Branch</b>	ECE

**Credits**  
3

- To learn the basic fundamentals of circuit components, circuit laws and network theorems
- To understand the concepts of semiconductor diode and its applications
- To understand the concepts of Bipolar Junction transistor

Active and Passive elements – R,L,C Components – types- resistance color coding, Voltage and Current sources, Devices – Multimeter, CRO, DSO and Function generator.

- Understand the circuit components, types and their relation (L2).
- Able to analyze different voltage and current sources (L4).
- Understand the basic operation of different devices (L2).

Ohm's law, Kirchhoff laws-network reduction techniques-series, parallel, series parallel circuits-source transformations. Thevenin's Theorem- Norton's Theorem- Superposition Theorem-maximum power transfer theorem.

- Apply Thevenin's and Norton theorems to analyze and design for maximum power transfer (L3).
- Apply network techniques, like node analysis and loop analysis, to write equations for large linear circuits (L3).
- Apply the concept of linearity and the technique of superposition to circuits and networks (L3).

Energy Band Diagram of Semiconductors (Intrinsic & Extrinsic), PN Diode, Drift & Diffusion currents, V-I Characteristics of PN Junction Diode (Ideal, Simplified and Piece-wise, Practical), Diode equation and it's mathematical derivation, Static and Dynamic Resistance, Temperature Dependency, Transition and Diffusion Capacitances, Breakdown Mechanisms in semiconductor diodes, Zener diode characteristics & Zener diode acts as a regulator.

- Analyze concepts of semiconductor devices and solve problems (L4).
- Study the characteristics and operation of p-n junction diode (L2).
- Explain the energy band diagram & effect of temperature on the characteristics of diode (L2).

Half Wave and Full Wave Rectifiers – General Filter Considerations – Capacitor Filter – RC Filter, Choke Filter, LC Filter,  $\pi$ -Filter.

- Analyze the performance of rectifiers with and without filters (L4).
- Understand the operation and usage of Rectifiers and Filters (L2).

Transistor constructions – types. Transistor operation in CB, CE and CC configurations and their Characteristics.

## Electronics and Communication Engineering

**Learning Outcomes:** At the end of the unit, the student will be able to:

- Understand the construction, operation and types of BJT (L2).
- Analyze the different configurations (CB,CE,CC) (L4).

**Prescribed Text Books:**

1. "Electronic Devices and Circuits" David A Bell, Fifth Edition, 2008, Oxford University Press
2. "Circuits & Network Analysis & Synthesis", Sudhakar. A & Shyamamohan S Palli, 4th Edition, Tata McGraw Hill, 2010
3. Engineering basics: Electrical, Electronics and computer Engineering" T.Thyagarajan, New Age International, 2007

### Reference Books:

1. "Electronic Devices and Circuits" J. Millman and Halkias, 1991 edition, 2008, TMH
2. "Electronic Devices and Circuit Theory" Robert L. Boylestad and Louis Nashelsky, 9<sup>th</sup> edition, PHI
3. "Electronic Principles" Albert Malvino, David J Bates, MGH, SIE 2007
4. "Micro Electronic Circuits" Sedra and Smith, Oxford University Press

**Course Outcomes:**

At the end of the course, the student will be able to

Blooms Level of Learning

- |   |    |
|---|----|
| 1. Understand the circuit components voltage, current, and their types. | L2 |
| 2. Apply the circuit simplification techniques                          | L3 |
| 3. Have the knowledge of semiconductor diodes.                          | L2 |
| 4. Understand the operation and usage of Rectifiers and filters.        | L2 |
| 5. Understand the basic concepts of Bipolar Junction Transistor         | L2 |

**CO-PO Mapping:**

Electronics and Communication Engineering  
**ANNAMACHARYA INSTITUTE OF TECHNOLOGY AND SCIENCES RAJAMPET**  
(An Autonomous Institution)

**Title of the Course**     Engineering Drawing  
**Category**                ESC  
**Course Code**           20A312T

**Year**                    I B. Tech  
**Semester**            I Semester  
**Branch**                Common for CE, EEE & ECE

Lecture Hours	Tutorial Hours	Practice Hours	Credits
1	0	4	3

**Course Objectives:**

- To bring awareness that Engineering Drawing is the Language of Engineers.
- To familiarize how industry communicates technical information.
- To teach the practices for accuracy and clarity in presenting the technical information.
- To develop the engineering imagination essential for successful design.
- To provide the basic geometrical information to ignite the innovative design ideas.

**Unit 1                    Introduction to Drawing and Engineering Curves.**

Theory Hours: **05**  
Practice sessions: **04**

Introduction: Lettering–Geometrical Constructions- Construction of polygons by General method. Conics: Ellipse, Parabola and Hyperbola (General method only). Special Methods: Ellipse - Concentric Circles method, Oblong method & Arcs of Circles method - Drawing tangent & normal to the conics. Cycloidal Curves: Cycloid, Epi-cycloid, Hypo-cycloid (simple problems) - Drawing tangent & normal to the Cycloidal curves.

**Learning Outcomes:** At the end of the unit, the student will be able to

- Understand the significance of engineering drawing and understand the geometrical constructions, conventions used in the engineering drawing. (L2)
- Identify the curves obtained in different conic sections and able to draw different conic curves. (L1)
- Know and draw the different Cycloidal curves, also its practical application in engineering. (L1)

**Unit 2                    Projections of Points and Lines.**

Theory Hours: **03**  
Practice sessions: **06**

Projections of points - Projections of lines inclined to one reference plane, Projections of lines inclined to both reference planes. True lengths and Traces of lines (simple problems).

**Learning Outcomes:** At the end of the unit, the student will be able to:

- Understand the principles and elements of projection. (L2)
- Know how to draw the projections of points, lines. (L1)
- Differentiate between projected length and true length and also find the true length of the lines. (L1)

**Unit 3                    Projections of Planes.**

Theory Hours: **05**  
Practice sessions: **04**

Projection of planes inclined to one reference plane - and inclined to both the reference planes.

**Learning Outcomes:** At the end of the unit, the student will be able to:

- Understand the projections of different geometrical regular plane surfaces. (L2)
- Identify and Construct the true shapes of the plane surfaces. (L1)
- Analyze the projections of plane surface inclined to both the planes. (L4)

**Unit 4                    Projections of Solids.**

Theory Hours: **04**  
Practice sessions: **05**

Projections Of simple Solids such as Cylinder, Cone, Prism and Pyramid - Axis Inclined to one reference plane,

## Electronics and Communication Engineering

Axis inclined to both the reference planes.

**Learning Outcomes:** At the end of the unit, the student will be able to:

- Understand different types of solids. (L2)
- Draw projection of simple solids. (L3)
- Draw the Projections of solids inclined to both the reference planes. (L3)

### Unit 5 Isometric Projections & Conversion of Views.

Theory Hours: **04**

Practice sessions: **05**

Isometric Projections: Projections of Lines, Planes and Simple Solids – Prism, Pyramid, Cylinder and Cone in simple positions only.

Conversion of Views: Conversions of Orthographic views in to Isometric views and Conversion of Isometric views to Orthographic views.

**Learning Outcomes:** At the end of the unit, the student will be able to:

- Understand the pictorial views such as isometric views, orthographic views and also differentiate between Isometric Projection and View. (L2)
- Draw the Isometric views of simple plane surfaces and simple solids. (L3)
- Draw the conversions of Isometric Views in to Orthographic Views and Vice-versa. (L3)

### Prescribed Text Books:

1. Engineering Drawing, N.D. Bhatt, Charotar Publishers, Edition 2016
2. Engineering Drawing, K.L. Narayana, P. Kanniah, Scitech Pub, Ed 2016

### Reference Books:

1. Engineering Drawing and Graphics, Venugopal/ New age, Ed 2015.
2. Engineering Drawing, Johle, Tata McGraw-Hill. Ed 2014
3. Engineering Drawing, Shah and Rana, 2/e, Pearson Education Ed 2015

### Course Outcomes:

At the end of the course, the student will be able to

Blooms Level of Learning

- |   |            |
|---|------------|
| 1. Understand the concepts of Conic Sections.   | L1, L2     |
| 2. Understand the concept of Cycloidal Curves, Involute and the application of industry standards.  | L1, L2     |
| 3. Understand the Orthographic Projections of Points and Lines and are capable to improve their visualization skills, so that they can apply these skills in developing the new products. | L1, L2, L4 |
| 4. Understand and apply Orthographic Projections of Planes.   | L2, L3     |
| 5. Understand and analyze the Orthographic Projections of Solids and conversion of isometric views to orthographic views vice versa.  | L2, L3     |

**Year** I B.Tech.  
**Semester** I Semester  
**Branch** ECE, EEE

<b>Lecture Hours</b>	<b>Tutorial Hours</b>	<b>Practice Hours</b>	<b>Credits</b>
0	0	3	1.5

**Course Objectives:**

- Learn the concepts of interference , diffraction and their applications and the role of optical fiber parameters in communication.
- Recognize the importance of energy gap in the study of conductivity and hall effect in a semiconductor.
- Know about the magnetic and dielectric materials applications.
- Apply the principles of semiconductors in various electronic devices.

**List of Experiments**

1. Determination of the thickness of the wire using wedge shape method
2. Determination of the radius of curvature of the lens by Newton's ring method
3. Determination of wavelength by plane diffraction grating method
4. Determination of Dispersive power of a diffraction grating
5. Determination of Resolving power of a grating
6. Determination of dielectric constant by charging and discharging method.
7. Determination of Magnetic field along the axis of a circular coil carrying current.
8. Determination of the self inductance of the coil (L) using Anderson's bridge.
9. Study the variation of B versus H by magnetizing the magnetic material (B-H curve)
10. Determination of the numerical aperture of a given optical fiber and hence to find its acceptance angle.
11. Measurement of magnetic susceptibility by Gouy's method
12. Determination of Hall voltage and Hall coefficient of a given semiconductor using Hall effect.
13. Determination of the resistivity of semiconductor by Four probe method
14. Determination of the energy gap of a semiconductor
15. Measurement of resistance with varying temperature.

2. <http://vlab.amrita.edu/index.php> -Virtual Labs, Amrita University

**Course Outcomes:**

Blooms Level of Learning

At the end of the course, student will be able to

- |  |         |
|--|---------|
| 1. Operate various optical instruments and estimate various optical parameters.  | L3      |
| 2. Estimate the various magnetic properties.                                     | L4      |
| 3. Measure properties of semiconductors.   | L4 & L5 |
| 4. Determine the properties of dielectric materials and optical fiber materials. | L5      |

### CO-PO MAPPING:

[illegible]

**ANNAMACHARYA INSTITUTE OF TECHNOLOGY AND SCIENCES RAJAMPET**  
(An Autonomous Institution)

**Title of the Course**      Problem Solving through C Programming Lab  
**Category**                ES  
**Course Code**            20A511L

**Year**                    I B. Tech  
**Semester**            I Semester  
**Branch**                CE, EEE, ME, ECE, CSE and AI & DS

<b>Lecture Hours</b>	<b>Tutorial Hours</b>	<b>Practice Hours</b>	<b>Credits</b>
0	0	3	1.5

**Course Objectives:**

- Setting up programming environment.
- Develop Programming skills to solve problems.
- Use of appropriate C programming constructs to implement algorithms.
- Identification and rectification of coding errors in program
- Develop applications using a modular programming and Manage data using files.

Minimum number of FOUR programs from each exercise is to be done students

**Data Types, Constants, Input and Output and expressions**

Exercise 1: Data types, Variables, Constants and Input and Output.

Exercise 2: Operators, Expressions and Type Conversions.

**Learning Outcomes**

At the end of this module, the student will be able to:

- Identify situations where computational methods and computers would be useful. (L2)
- Approach the programming tasks using techniques learned and write pseudo-code. (L2)
- Write the program on a computer, edit, compile, debug, correct, recompile and run it. (L4)

**Decision Control Statements and Arrays**

Exercise 3: Conditional Statements [two way and multipath].

Exercise 4: Loop Control Statements. [for, while and do-While]

Exercise 5: Unconditioned JUMP Statements- break, continue, goto.

Exercise 6: Declaring Arrays, Referencing Arrays, Array Subscripts. Using for loop for sequential Access.

Exercise 7: Multidimensional Arrays

**Learning Outcomes**

At the end of this module, the student will be able to:

- Choose the right data representation formats based on the requirements of the problem. (L3)
- Use the comparisons and limitations of the various programming constructs and choose the right one for the task in hand. (L3)
- Identify tasks in arrays with different techniques that are applicable and apply them to write programs. (L2)
- Design and implement operations on both single and Multidimensional arrays. (L6)

**Strings and Functions**

Exercise 8: String Basics, String Library Functions and Array of Strings.

Exercise 9: Simple user defined functions, Parameter passing methods- pass by value, pass by reference.

Exercise 10: Storage classes- Auto, Register, Static and Extern

Exercise 11: Recursive Functions, Preprocessor commands.

Exercise 12: Array Elements as Function Arguments.

**Learning Outcomes:**

At the end of this module, the student will be able to:

- Implement and test the programs on strings using string manipulation functions. (L5)

## Electronics and Communication Engineering

- Analyze programming problems to choose when regular loops should be used and when recursion will produce a better program (L4)

### Pointers

Exercise 13: Pointers, Dynamic memory allocation and error handling

#### Learning Outcomes:

At the end of this module, the student will be able to:

- Design and develop Computer programs, analyzes, and interprets the concept of pointers and their usage. (L6)
- Identify tasks in which the dynamic memory allocation techniques learned are applicable and apply them to write programs, and hence use computers effectively to solve the task. (L2)

### Structures and Files

Exercise 14: Structures

Exercise 15: File handling

#### Learning Outcomes:

At the end of this module, the student will be able to:

- Define structure data types and use them in simple data processing applications. (L2)
- Develop and test C programs for simple applications using files. (L6)

#### Prescribed Text Books:

- C Programming and Data Structures. B.A. Forouzan, R. F. Gilberg, Cengage learning, Indian edition.
- C and Data Structures, E. Balaguruswamy, Tata McGraw Hill.
- Programming in C and Data Structures, J.R. Hanly, Ashok N. Kamthane and A. Ananda Rao, Pearson Education.

- Reema Tharaja "Introduction to C Programming", Second Edition, OXFORD Press, 2015
- <https://www.cprogramming.com/>
- <https://www.mycplus.com/tutorials/c-programming-tutorials>

#### Course Outcomes:

At the end of the course, the student will be able to

Blooms Level of Learning

- Identify and setup program development environment
- Implement the algorithms using C programming language constructs
- Identify and rectify the syntax errors and debug program for semantic errors
- Solve problems in a modular approach using functions
- Implement file operations with simple text data

<b>Lecture Hours</b>	<b>Tutorial Hours</b>	<b>Practical</b>	<b>Credits</b>
0	0	3	1.5

**Course Objectives:**

1. To identify the various electrical and electronic components and devices.
2. To analyze the performance of rectifier circuits in practical approach
3. To observe the characteristics of semiconductor devices.

**List of the Experiments**

1. Identification, Specifications, Testing of R, L, C Components (Color Codes), Potentiometers, Switches (SPDT, DPDT, and DIP), Coils, Gang Condensers, Relays, Bread Boards, PCBs, Diodes, BJT)
2. Study and operation of
  - Multi-meters (Analog and Digital)
  - Function Generator
  - Regulated Power Supplies
  - Cathode Ray Oscilloscope (CRO)
3. Verification of Kirchhoff's Voltage and Current Law.
4. Verification of Thevenins theorem.
5. Verification of Norton's theorem.
6. Forward and Reverse Bias Characteristics of PN junction Diode.
7. Zener Diode acts as Voltage Regulator.
8. Half Wave Rectifier with and without filter.
9. Full Wave (Center trapped) Rectifier with and without filter.
10. Bridge Rectifier with and without filter
11. Input and Output Characteristics of Transistor in CB Configuration.
12. Input and Output Characteristics of Transistor in CE Configuration.

**Course Outcomes:**

Student will be able to

Blooms Level of  
Learning

- |   |    |
|---|----|
| 1. Understand the analysis of basic electrical laws and theorems. | L1 |
| 2. Gain the practical knowledge of Diode, BJTs.                   | L1 |

**Semester** II Semester  
**Branch** CE, EEE, ME, ECE, CSE & AI&DS

<b>Lecture Hours</b>	<b>Tutorial Hours</b>	<b>Practice Hours</b>	<b>Credits</b>
3	0	0	3

**Course Objectives:**

- To enlighten the learners in the concept of differential equations and multivariable calculus.
- To furnish the learners with basic concepts and techniques at plus two level to lead them into advanced level by handling various real world applications.

**Unit 1 Linear differential equations of higher order with constant Coefficients 10**

Basic concepts - general solution-operator D-rules for finding complimentary function-inverse operator-rules for finding particular integral for RHS term of the type  $e^{ax}$ ,  $\sin ax / \cos ax$ , polynomials in  $x$ ,  $e^{ax} \sin ax / e^{ax} \cos ax / e^{ax} x^n$ ,  $x \sin ax / x \cos ax$  -method of variation of parameters.

**Learning Outcomes:** At the end of the unit, the student will be able to

- identify the essential characteristics of linear differential equations with constant coefficients (L3)
- solve the linear differential equations with constant coefficients by appropriate method (L3)

**Unit 2 Equations reducible to Linear Differential Equations with constant coefficients 8**

Cauchy's and Legendre's linear equations, simultaneous linear equations with constant coefficients

Applications: Electrical Circuits – L-C and L-C-R Circuit problems.

**Learning Outcomes:** At the end of the unit, the student will be able to

- classify and interpret the solutions of linear differential equations (L4)
- generalize and solve the higher order differential equation by analyzing physical situations (L3)

**Unit 3 Partial Differential Equations 8**

Formation of PDEs by eliminating arbitrary constants and arbitrary functions, solutions of first order linear and non-linear PDEs (Charpit's method). Introduction to method of separation of variables for second order linear Partial Differential Equations.

**Learning Outcomes:** At the end of the unit, the student will be able to

- apply the techniques to find solutions of standard PDEs (L3)
- solve the boundary value problems (L3)

**Unit 4 Vector Differentiation 8**

Scalar and vector point functions, vector operator Del, Gradient, Divergence and Curl operators, vector identities.

**Learning Outcomes:** At the end of the unit, the student will be able to

- apply del to scalar and vector point functions (L3)
- illustrate the physical interpretation of Gradient, Divergence and Curl (L2)

**Unit 5 Vector integration 10**

Line integral-circulation-work done, surface integral, Green's theorem in the plane (without proof), Stoke's theorem

## Electronics and Communication Engineering

(without proof), volume integral, Divergence theorem (without proof) and applications of these theorems.

**Learning Outcomes:** At the end of the unit, the student will be able to

- find the work done in moving a particle along the path over a force field (L1)
- apply Green's, Stokes and Divergence theorem in evaluation of double and triple integrals (L3)

### Prescribed Textbooks:

4. H. K. Das, Er. Rajnish Verma, Higher Engineering Mathematics, S. Chand.

### Course Outcomes:

At the end of the course, the student will be able to

Blooms Level of  
Learning

1. solve the differential equations related to various engineering fields
2. generalize and solve the higher order differential equation by analyzing physical situations
3. identify solution methods for partial differential equations that model physical processes
4. understand the physical meaning of different operators such as gradient, curl and divergence
5. find the work done against a field, circulation and flux using vector calculus

<b>Lecture Hours</b>	<b>Tutorial Hours</b>	<b>Practice Hours</b>	<b>Credits</b>
3	0	0	3

**Course Objectives:**

- To instruct electrode potential and differentiation of different electrodes and their applications.
- To impart knowledge on the basic concepts of battery technology.
- To explain how to synthesize different polymers and differentiate polymers based on properties.
- To introduce different types of instrumental techniques and molecular machines and molecular switches.

**Unit 1 Electrochemical Energy Systems - I 10**

Introduction- Electrochemical Cell, Galvanic Cell vs. Electrolytic Cell, Electrochemical conventions. Origin of electrode potential, Electrode Potentials, Measurement of Electrode Potentials, Nernst Equation for a single electrode, EMF of a cell. Types of Electrodes or Half Cells-Hydrogen and Calomel electrodes. Types of Ion Selective Electrodes - glass membrane electrode, polymer membrane electrodes, solid state electrodes, gas sensing electrodes (classification only)

**Learning Outcomes:** At the end of the unit, the student will be able to:

- explain the construction of different ion selective electrodes (L2)
- solve problems based on cell potential and EMF(L3)
- apply Nernst equation for calculating electrode and cell potentials (L3)

**Unit 2 Electrochemical Energy Systems - II 10**

Basic concepts of batteries, battery characteristics, classification of batteries, Important applications of batteries, Classical batteries-dry/Leclanche cell, Modern batteries-zinc air, lithium cells-Li MnO<sub>2</sub> cell- challenges of battery technology. Fuel cells - Introduction - classification of fuel cells – Hydrogen and Oxygen fuel cell, propane and oxygen fuel cell - Merits of fuel cells.

**Learning Outcomes:** At the end of the unit, the student will be able to:

- explain the theory of construction of battery and fuel cells (L2)
- describe the working principle of Fuel cells (L2)
- summarize the applications of batteries (L4)

**Unit 3 Polymer Chemistry 10**

Introduction to polymers, functionality of monomers, chain growth and step growth polymerization, coordination polymerization, copolymerization (stereospecific polymerization) with specific examples and mechanisms of polymer formation.

Plastics - Thermoplastics and Thermosettings, Preparation, properties and applications of Bakelite, urea-formaldehyde, Nylon-6. Elastomers Preparation, properties, and applications of Buna-S, Buna-N. Conducting polymers – polyacetylene, polyaniline – mechanism of conduction and applications

**Learning Outcomes:** At the end of the unit, the student will be able to:

- explain the preparation, properties and applications of Bakelite, and Nylon-6,6 (L2)
- illustrate the mechanism of conduction in polyacetylene and polyaniline (L3)
- discuss Buna-S and Buna-N elastomers and their applications (L2)

**Unit 4 Instrumental Methods and their Applications**

Electromagnetic spectrum. Absorption of radiation: Beer-Lambert's law.

Principle and applications of pH metry, Potentiometry, Conductometry, UV-Visible, IR Spectroscopy, Gas Chromatography (GC) Thin layer chromatography (TLC)

**Learning Outcomes:** At the end of the unit, the student will be able to:

- distinguish the ranges of different types of spectral series in electromagnetic spectrum (L4)
- understand the principles of different analytical instruments (L2)
- differentiate between pH metry, potentiometry and conductometry (L4)

**Unit 5 Molecular Machines & Switches**

Molecular machines: Rotaxanes and Catenanes as artificial molecular machines, prototypes – linear motions in rotaxanes, an acid-base controlled molecular shuttle, a molecular elevator, an autonomous light-powered molecular motor, systems based on Catenanes.

Molecular switches – Introduction to molecular switches, Cyclodextrin-based switches, in and out switching, back and forth switching, displacement switching

**Learning Outcomes:** At the end of the unit, the student will be able to:

- describe the mechanism involved in linear motion of Rotaxanes (L2)
- explain different types of switching in Cyclodextrins (L4)
- demonstrate the applications of Rotaxanes and Catenanes as artificial molecular machines (L2)

**Prescribed Textbooks:**

1. O.G. Palanna, Engineering Chemistry, 2/e, Tata McGraw Hill Education Private Limited, 2017.
2. P.C. Jain and M. Jain, Engineering Chemistry, 17/e, Dhanpat Rai & Sons, 2018

**Reference Books:**

3. T. Ross Kelly, Molecular Machines, 1/e, Springer Berlin Heidelberg, 2005
4. Ben L. Feringa, Wesley R. Browne, Molecular Switches, 2/e, Wiley, 2011

**Course Outcomes:**

At the end of the course, the student will be able to

Blooms Level of Learning

1. explain the significance of electrode potentials, classify ion selective electrodes, and list different types of electrodes L2
2. Compare various batteries, explain the concepts involved in the construction of lithium cells, different fuel cells and apply redox principles for construction of batteries and fuel cells. L4
3. illustrate the mechanism of conduction in conducting polymers, and explain the preparation, properties, and applications of various polymers L3
4. differentiate various analytical techniques L4
5. compare molecular switches and molecular machines, and distinguish between molecular machines L4

**Branch**               ECE

<b>Lecture Hours</b>	<b>Tutorial Hours</b>	<b>Practice Hours</b>	<b>Credits</b>
3	0	0	3

**Course Objectives:**

- To understand the concepts of biasing and stabilization in BJT
- To understand the concepts of FET, MOSFET and their biasing techniques.
- To analyze the parameters like gain and impedances for single stage amplifier circuits.
- To understand the small signal analysis of BJT and FET Amplifiers.
- To understand the working principles of special purpose electronic devices.

**Unit 1                    Biasing & Stability** **9**

Overview of BJT Configurations, Transistor Amplifying Action – Load Line Analysis of AC & DC – Operating Point. Types of Biasing: Fixed Bias – Emitter Bias – Emitter Feedback Bias - Collector to Base bias – Voltage Divider Bias. Bias Stability: Need for Stabilization – Stabilization Factors ( $s, s', s''$ ) – Stability Factors for Voltage Divider Bias - Thermal Stability and Thermal Runaway – Heat Sinks.

**Learning Outcomes:** At the end of the unit, the student will be able to:

- Able to understand the concepts of stability and biasing of BJT (L2).
- Able to find the stability factor of different biasing techniques of BJT (L2).
- Understand the concepts of thermal stability, Run away and heat sinks (L2).

**Unit 2                    Field Effect Transistors & Its Biasing** **9**

Construction of JFETs – Transfer Characteristics – FET Biasing: Fixed Bias Configuration – Self Bias Configuration – Voltage Divider Biasing – Construction and Characteristics of MOSFETs – Depletion type MOSFETs – Enhancement type MOSFETs-Biasing in MOSFETs.

**Learning Outcomes:** At the end of the unit, the student will be able to:

- Understand the construction and operation of JFET and MOSFET (L2).
- Able to design different biasing for JFET and MOSFET (L3).

**Unit 3                    Single Stage Amplifiers** **9**

Single Stage Transistor Amplifier-How Transistor Amplifies- Graphical Demonstration of Transistor Amplifier- Practical Circuit of Transistor Amplifier-Phase Reversal-Classification of Amplifiers- Amplifier equivalent circuit – Concepts of h-parameters – Analysis of CE, CB and CC Amplifiers – Comparisons of CE,CB and CC.

**Learning Outcomes:** At the end of the unit, the student will be able to:

- Able to understand single stage transistor amplifier and it's operation (L2).
- Able to understand the concepts of h-parameters (L2).

**Unit 4                    FET Amplifiers** **9**

Small signal model of JFET and MOSFET – Common source and common Drain amplifiers using FET.

**Learning Outcomes:** At the end of the unit, the student will be able to:

- Understand the concepts of small signal model of JFET and MOSFET (L2).
- Able to identify different parameters of JFET and MOSFET (L1).

**Unit 5                    Special Purpose Electronic Devices** **9**

LED, Tunnel Diode, PIN Diode, SCR, UJT, Photodiode, Phototransistor, Varactor diode

**Learning Outcomes:** At the end of the unit, the student will be able to

## Electronics and Communication Engineering

- Able to understand the construction and operation of different special purpose devices (L2).
- Able to identify different symbols of special purpose electronic devices (L1).

### Prescribed Text Books:

1. Electronic Devices and Circuits, David A Bell, Fifth Edition, 2008, Oxford University Press.

**Year** I Year  
**Semester** II Semester  
**Branch** CE, ME, CSE, AIDAS

<b>Lecture Hours</b>	<b>Tutorial Hours</b>	<b>Practice Hours</b>	<b>Credits</b>
3	0	0	3

**Course Objectives:**

To impart the knowledge about the basic concepts of circuit analysis and Transient Response.  
To inculcate the understanding about AC circuits and resonance  
To understand the concepts of two port networks.  
To understand the working of various Electrical Machines

**Unit 1 Basic Electrical Circuits & Transient Analysis 9**

BASIC ELECTRICAL CIRCUITS: Network Reduction Techniques, Star & Delta transformations, Source Transformation, Nodal & Mesh Analysis, Super Node & Super Mesh Concepts - Problems. TRANSIENT ANALYSIS: Transient Response of RL, RC & RLC Series Circuits for DC Excitation using differential equation approach.

**Learning Outcomes:** At the end of the unit, the student will be able to

- Understand the fundamental laws of Electrical Engineering. L1
- understand the Kirchhoff's laws L1
- Use network techniques like node analysis and loop analysis to write equations for large linear circuits L3

**Unit 2 Fundamentals of AC Circuits & Resonance 9**

FUNDAMENTALS OF AC CIRCUITS: Advantages of AC Supply, Types of Wave Forms, Importance of Sinusoidal Wave Forms, Cycle, Time Period, Frequency & Amplitude, Determination of Average & RMS Value, Form Factor & Peak Factor for different Alternating Wave Form. RESONANCE: Resonant frequency, Band Width & Q-Factor for Series and Parallel RLC Network only.

**Learning Outcomes:** At the end of the unit, the student will be able to

- Understand and use the concepts of reactance and impedance to analyse simple a.c. circuits L1
- Calculate the power dissipation of an a.c. circuit, and understand the concept of power factor. L4
- Explain the effect of resonance, and its implications for practical circuits L4
- Understand resonant circuits which are used in wireless transmission and communication networks L1

**Unit 3 Two Port Networks**

TWO PORT NETWORKS: Impedance, Admittance, Hybrid, Transmission (ABCD) Parameters, Conversion of one Parameter to another Parameter, Conditions for Reciprocity & Symmetry, Inter connection of Two Port Networks in Series, Parallel and Cascaded Configurations, Problems

- **Learning Outcomes:** At the end of the unit, the student will be able to
- Understand two port networks L1
- Know about reciprocity and symmetry of two port network L1
- Understand interconnection of Two port network L1

**Unit 4 D.C Machines**

DC Generator: Constructional Features, Principle of operation, EMF Equation, Types, Magnetization Characteristics, Applications. DC Motor: Principle of operation, Back EMF, Torque Equation, Characteristics of DC Shunt Motor, Losses & Efficiency, Testing - Brake Test & Swinburne's Test - Speed control of DC shunt Motor, Applications

**Learning Outcomes:** At the end of the will unit, the student be able to understand construction and operation of DC machines L1

understand the performance of DC machines L1  
know the speed control methods of DC motor L1

9

### Unit 5 AC Machines

Single Phase Transformer: Principle of operation, Types, Constructional Features, EMF equation, Losses, Efficiency & Regulation, OC & SC Tests and Pre-Determination of Efficiency & Regulation-Introduction to Three Phase.

Three Phase Induction Motor: Principle of operation, Torque equation, Torque-slip characteristics, Brake test on three phase induction motor.

**Learning Outcomes:** At the end of the will unit, the student be able to

- understand construction and operation of various AC machines L1
- understand the performance of various AC machines L1

### Prescribed Textbook:

1. Network Analysis by A. Sudhakar & Shyam Mohan S. Pillai, Tata McGraw Hill, 3 rd Edition, New Delhi, 2009.
2. T.Thyagarajan, Fundamentals of Electrical and Electronics Engineering. SciTech publications, 2011, 5th Ed
3. D. C. Kulshreshta, "Basic Electrical Engineering", McGraw Hill, 2009.
4. P.S.Dhagal "Basic Electrical Engineering with Numerical Problems" McGraw Hill, 2006.
5. A. Chakrabarti. Circuit Theory. 6 th edition, DhanpatRai& Co, New Delhi, 2014.
6. A.Sudhakar and Shyammohan S Palli, "Circuits and Networks" McGraw Hill, 2018.

### Reference Books

1. M.S Naidu and S.Kamakshaiah, Introduction to Electrical Engineering. TMH Publications.
2. D.P Kothari and I.J Nagrath, Basic Electrical Engineering, TMH, 3rdEd.2010
3. Millman and Halkias, Electronics devices and circuits
4. S.Salivahanan, N,Suresh Kumar, "Electronic Devices and Circuits" McGraw Hill, 2011.

### Course Outcomes:

At the end of the course, the student will be able to

Blooms Level of Learning

- |   |       |
|---|-------|
| 1. Impart the basic knowledge about the Electric circuits.                      | L1    |
| 2. Understand the working of various DC Machines and analyze their performance. | L1,L4 |
| 3. Understand the working of various AC Machines and analyze their performance. | L1,L4 |
| 4. Know about various electronic devices.                                       | L1    |
| 5. Understand the various electrical installations and measuring instruments    | L1    |

Lecture Hours	Tutorial Hours	Practice Hours	Credits
3	0	0	3

**Course Objectives:**

- To facilitate effective listening skills for better comprehension of academic lectures and English spoken by native speakers
- To focus on appropriate reading strategies for comprehension of various academic texts and authentic materials
- To Help improve speaking skills through participation in activities such as role plays, discussions and structured talks/oral presentations
- To impart effective strategies for good writing and demonstrate the same in summarizing, writing well organized essays
- To provide knowledge of grammatical structures and vocabulary and encourage their appropriate use in speech and writing

**Unit 1**

9

**Prescribed Lesson: *On the Conduct of Life* by William Hazlitt**

**Listening:** Identifying the topic, the context, and specific pieces of information by listening to short audio texts and answering a series of questions.

**Speaking:** Asking and answering general questions on familiar topics such as home, family, work, studies, and interests; introducing oneself and others.

**Reading:** Skimming to get the main idea of a text; scanning to look for specific pieces of information.

**Reading for Writing:** Beginnings and endings of paragraphs - introducing the topic, summarizing the main idea and/or providing a transition to the next paragraph.

**Grammar and Vocabulary:** Parts of Speech, Content words and function words; word forms: verbs, nouns, adjectives and adverbs; nouns: countable and uncountable; singular and plural; basic sentence structures; simple question form - wh-questions; word order in sentences.

- **Learning Outcomes:** At the end of this unit, the student will be able to
- understand social or transactional dialogues spoken by native speakers of English and identify the context, topic, and pieces of specific information (L1)
- ask and answer general questions on familiar topics and introduce oneself/others (L2)
- employ suitable strategies for skimming and scanning to get the general idea of a text and locate specific information (L3)
- recognize paragraph structure and be able to match beginnings/endings/headings with paragraphs (L2)
- form sentences using proper grammatical structures and correct word forms (L4)

**Unit 2**

9

**Prescribed Lesson: *The Brook* by Alfred Tennyson**

**Listening:** Answering a series of questions about main idea and supporting ideas after listening to audio texts.

**Speaking:** Discussion in pairs/small groups on specific topics followed by short, structured talks.

**Reading:** Identifying sequence of ideas; recognizing verbal techniques that help to link the ideas in a paragraph together.

**Writing:** Paragraph writing (specific topics) using suitable cohesive devices; mechanics of writing - punctuation, capital letters.

**Grammar and Vocabulary:** Cohesive devices - linkers, signposts and transition signals; use of articles and zero

article; prepositions.

**Learning Outcomes:** At the end of this unit, the student will be able to

- comprehend short talks on general topics (L1)
- participate in informal discussions and speak clearly on a specific topic using suitable discourse markers (L3)
- understand the use of cohesive devices for better reading comprehension (L1)
- write well-structured paragraphs on specific topics (L4)
- identify basic errors of grammar/ usage and make necessary corrections in short texts (L2)

### Unit 3

9

**Prescribed Lesson: *The Death Trap* by Saki**

**Listening:** Listening for global comprehension and summarizing what is listened to.

**Speaking:** Discussing specific topics in pairs or small groups and reporting what is discussed

**Reading:** Reading a text in detail by making basic inferences -recognizing and interpreting specific context clues; strategies to use text clues for comprehension.

**Writing:** Summarizing, Paragraph Writing, identifying main idea/s and rephrasing what is read; avoiding redundancies and repetitions

**Grammar and Vocabulary:** Verbs - tenses; subject-verb agreement; direct and indirect speech, reporting verbs for academic purposes.

**Learning Outcomes:** At the end of the unit, the student will be able to

- comprehend short talks and summarize the content with clarity and precision (L1)
- participate in informal discussions and report what is discussed (L3)
- infer meanings of unfamiliar words using contextual clues (L3)
- write summaries based on global comprehension of reading/listening texts (L4)
- use correct tense forms, appropriate structures and a range of reporting verbs in speech and writing (L4)

### Unit 4

9

**Prescribed Lesson: *Muhammad Yunus***

**Listening:** Making predictions while listening to conversations/ transactional dialogues without video; listening with video.

**Speaking:** Role plays for practice of conversational English in academic contexts (formal and informal) - asking for and giving information/directions.

**Reading:** Studying the use of graphic elements in texts to convey information, reveal trends/patterns/relationships, communicate processes or display complicated data.

**Writing:** Writing structured essays on specific topics using suitable claims and evidence.

**Grammar and Vocabulary:** Quantifying expressions - adjectives and adverbs; comparing and contrasting; Voice - Active & Passive Voice

**Learning Outcomes:** At the end of the unit, the student will be able to

- infer and predict about content of spoken discourse (L2)
- understand verbal and non-verbal features of communication and hold formal/informal conversations (L1)
- interpret graphic elements used in academic texts (L3)
- produce a coherent paragraph interpreting a figure/graph/chart/table (L4)
- use language appropriate for description and interpretation of graphical elements (L3)

### Unit 5

9

**Prescribed Lesson: *The Dancer with a White Parasol* by Ranjana Deve**

**Listening:** Identifying key terms, understanding concepts and answering a series of relevant questions that test comprehension.

**Speaking:** Formal oral presentations on topics from academic contexts - without the use of PPT slides.

**Reading:** Reading for comprehension.

**Writing:** Letter Writing: Official Letters/Report Writing

**Grammar and Vocabulary:** Editing short texts –identifying and correcting common errors in grammar and usage (articles, prepositions, tenses, subject verb agreement)

**Learning Outcomes:** At the end of the unit, the student will be able to

- take notes while listening to a talk/lecture and make use of them to answer questions (L4)
- make formal oral presentations using effective strategies (L4)
- comprehend, discuss, and respond to academic texts orally and in writing. (L3)
- produce a well-organized essay with adequate support and detail (L4)

## Electronics and Communication Engineering

- edit short texts by correcting common errors (L3)

### Prescribed Textbook:

Language and Life, Orient Black Swan (with CD).

### Reference Books

English Grammar in Use: A Self Study Reference and Practice Book, Raymond Murphy, Fourth Edition, Cambridge Publications

English Grammar and Composition, David Grene, Mc Millan India Ltd

**Semester** II Semester  
**Branch** EEE, ECE

**Lecture Hours**  
3

**Tutorial Hours**  
0

**Practice Hours**  
0

**Credits**  
0

**Course Objectives:**

- To make the student to be aware of environment and understand the importance of protecting natural resources.
- To enable the student to understand the importance of ecosystems and biodiversity for future generations.
- To sensitize the student with pollution problems due to the day-to-day activities of human life.
- To enable the student acquire skills for identifying and solving the social issues related to environment.
- To enable the student to understand the impact of human population on the environment.

**Unit 1 Multidisciplinary Nature of Environmental Studies 10**

Definition, Scope and Importance – Need for Public Awareness. Natural resources: Renewable and non-renewable resources – Forest resources: Uses, deforestation– Water resources: Uses, floods, drought – Mineral resources: Uses, environmental effects of extracting mineral resources – Food resources: Impacts of overgrazing, problems with traditional agriculture, effects of modern agriculture – Land Resources: Land degradation, soil erosion - Energy resources: Renewable and non-renewable energy resources.

**Learning Outcomes:** At the end of the unit, the student will be able to:

- Understand the importance of public awareness (L1).
- Identify various natural resources (L2).

**Unit 2 Ecosystems, Biodiversity and its Conservation 10**

Ecosystems: Producers, consumers and decomposers – Food chains, food webs and ecological pyramids – Introduction, types, characteristic features, structure and function of the following ecosystem: Forest ecosystem, lake ecosystem.

Biodiversity and Its Conservation: Definition – Value of biodiversity - Hot-spots of biodiversity – Threats to biodiversity – Conservation of biodiversity.

**Learning Outcomes:** At the end of the unit, the student will be able to:

- Explain the concept of ecosystem (L2).
- Recognize the importance of biodiversity (L2).

**Unit 3 Environmental Pollution 8**

Definition, Causes, effects and control measures of: Air Pollution, Water pollution, Soil pollution, Marine pollution, Noise pollution, Thermal pollution, Nuclear hazards.

**Learning Outcomes:** At the end of the unit, the student will be able to:

- Illustrate the different types of pollution (L2).
- Describe various sources, effects and control measures of pollution (L2).

**Unit 4 Social Issues and the Environment**

**10**

Rain water harvesting, Environmental ethics: Issues and possible solutions – global warming, acid rain, ozone layer depletion – Environment Protection Act – Air (Prevention and Control of Pollution) Act – Water (Prevention and control of Pollution) Act – Wildlife Protection Act – Forest Conservation Act.

**Learning Outcomes:** At the end of the unit, the student will be able to:

- Interpret social issues related to environment (L3).
- Relate importance of environmental acts (L4).

**Unit 5 Human Population and the Environment**

**7**

Population explosion – Family Welfare Programmes – Environment and human health – Value Education – HIV/AIDS – Role of information Technology in Environment and human health, Field work – Visit to a local area to document environmental assets.

**Learning Outcomes:** At the end of the unit, the student will be able to:

- Understand the effects of population explosion (L1).
- Identify the natural assets and their relationship (L2).

**Prescribed Textbooks:**

1. Perspectives in environmental Studies, Anubha Kaushik and C P Kaushik, New Age International Publishers, New Delhi, 2018.
2. A Textbook of Environmental Studies, Shashi Chawla, McGraw Hill Education, New Delhi, 2017.

**Reference Books:**

1. Environmental Studies by Benny Joseph, McGraw Hill Education, New Delhi, 2017.
2. A textbook of environmental studies, A Dhinakaran and B Sankaran, Himalaya Publishing House, Mumbai, 2017.
3. Fundamentals of environmental studies, Mahua Basu and S Xavier, Cambridge University Press, New Delhi, 2017.
4. Textbook of Environmental Studies for undergraduate courses, Erach Bharucha for University Grant Commission, University press, New Delhi, 2013.
5. A textbook of environmental studies, Vijay kumarTiwari, Himalaya Publishing House, Mumbai, 2017.

**Course Outcomes:**

At the end of the course, the student will be able to

Blooms Level of Learning

1. Explain how natural resources should be used.
2. Identify the need to protect ecosystems and biodiversity for future generations.
3. List out the causes, effects, and control measures of environmental pollution.
4. Demonstrate knowledge to the society in the proper utilization of goods and services.
5. Outline the interconnectedness of human dependence on the earth's ecosystems.

### Practice Hours

**Credits**  
1.5

**Course Objectives:**

- To read and interpret job drawing, plan various operations and make assembly.
- To identify and select the hand tools and instruments used in various trades.
- To gain practical skills by performing the experiments in different trades of workshop.
- Demonstrate the parts of a personal computer system
- Demonstrate the Installation the operating system and other software required in a personal computer system
- Introduce connecting the PC on to the internet from home and workplace and effectively usage of the internet, Usage of web browsers, email, news groups and discussion forums
- Introduce the usage of Productivity tools in crafting professional word documents, excel spreadsheets and power point presentations
- To utilize MS Office tools

## Engineering Workshop:

Trade 1	Carpentry Shop	02
---------	----------------	----

Two joints (exercises) from : Mortise and tenon T joint, Dove tail joint, Bridle T joint, middle lap T joint, Half Lap joint, cross lap joint, Corner Dovetail joint or Bridle Joint from soft wood stock.

**Learning Outcomes:** At the end of the unit, the student will be able to apply wood working skills in real world applications. (L3)

**Trade 2      Sheet metal shop      02**

Two jobs (exercises) from: Tapered Tray, cylinder, conical funnel from out of 22 or 20 guage G.I. sheet

**Learning Outcomes:** At the end of the unit, the student will be able to build different parts with metal sheets used in various appliances (L3)

Trade 3	Fitting shop	02
---------	--------------	----

Two jobs (exercises) from: square Fit, V-Fit, Semi-circular fit, dove tail fit from M.S. stock

**Learning Outcomes:** At the end of the unit, the student will be able to apply fitting operations in various assemblies. (L3)

**Trade 4      House-wiring      02**

Two jobs (exercises) from: Parallel and Series, Two way switch, Tube –Light connection, Stair case connection.

**Learning Outcomes:** At the end of the unit, the student will be able to apply basic electrical engineering knowledge for house wiring practice. (L3)

**Trade 5 Demonstration**

**01**

Any one trade of Plumbing • Machine Shop • Metal Cutting • Soldering and Brazing

**Learning Outcomes:** At the end of the unit, the student will be able to get the basic awareness of any of trade demonstrated. (L3)

**Prescribed Text Books:**

1. Kannaiah P. and Narayana K.L., Workshop Manual, 3rd Edn, Scitech publishers.
2. John K.C., Mechanical Workshop Practice. 2nd Edn. PHI 2010.

**Reference Books:**

1. Jeyapoovan T. and Pranita S., Engineering Practices Lab Manual, 3rd Edn. Vikas Pub. 2008.

**IT Workshop:**

**Task 1**

**01**

**Learn about Computer:** Identify the internal parts of a computer, and its peripherals. Represent the same in the form of diagrams including Block diagram of a computer. Write specifications for each part of a computer including peripherals and specification of Desktop computer. Submit it in the form of a report

**Learning Outcomes:** At the end of the unit, the student will be able to:

- Identify the parts of a computer (L2)
- Know the usage of internal parts of a computer (L2)

**Task 2**

**01**

**Install Operating System:** Student should install Linux on the computer. Students should record the entire installation process.

**Learning Outcomes:** At the end of the unit, the student will be able to:

- Install another operating systems (L1)
- Know how to install software's (L2)

**Task 3**

**01**

**Browsing Internet:** Student should access the Internet for Browsing. Students should search the Internet for required information. Students should be able to create e-mail account and send email. They should get acquaintance with applications like Face book, Skype etc. If Intranet mailing facility is available in the organization, then students should share the information using it. If the operating system supports sending messages to multiple users (LINUX supports it) in the same network, then it should be done by the student. Students are expected to submit the information about different browsers available, their features, and search process using different natural languages, and creating e-mail account.

**Learning Outcomes:** At the end of the unit, the student will be able to:

- Create e-mail account and send email (L2)
- Browse internet for required information (L2)

**Task 4**

**01**

**Word Processor:** Students should be able to create documents using the word processor tool. Some of the tasks that are to be performed are inserting and deleting the characters, words and lines, Alignment of the lines, Inserting header and Footer, changing the font, changing the colour, including images and tables in the word file, making page setup, copy and paste block of text, images, tables, linking the images which are present in other directory, formatting paragraphs, spell checking, etc. Students should be able to prepare project cover pages, content sheet and chapter pages at the end of the task using the features studied. Students should submit a user manual of the word processor considered. .

**Learning Outcomes:** At the end of the unit, the student will be able to:

- Prepare project documents, user manuals (L3)
- Get the knowledge on word processor tool (L1)

## Task 5

01

**Spreadsheet:** Students should be able to create, open, save the application documents and format them as per the requirement. Some of the tasks that may be practiced are Managing the worksheet environment, creating cell data, inserting and deleting cell data, format cells, adjust the cell size, applying formulas and functions, preparing charts, sorting cells. Students should submit a user manual of the Spreadsheet application considered.

**Learning Outcomes:** At the end of the unit, the student will be able to:

- Create , open and save spread sheets (L3)
- Apply formulas for different tasks (L4)

## Task 6

01

**Presentations:** creating, opening, saving and running the presentations, selecting the style for slides, formatting the slides with different fonts, colours, creating charts and tables, inserting and deleting text, graphics and animations, bulleting and numbering, hyper linking, running the slide show, setting the timing for slide show. Students should submit a user manual of the Presentation tool considered.

**Learning Outcomes:** At the end of the unit, the student will be able to:

- Create , open and save slides (L4)
- Create their own presentations for seminars (L4)

## Prescribed Text Books:

1. Introduction to Information Technology, ITL Education Solutions limited, Pearson Education.
2. Upgrading and Repairing PC's, 22<sup>nd</sup> Edition, Scott Muller QUE, Pearson Education.
3. Comdex Information Technology Course Kit, Vikas Gupta, WILEY Dream tech.
4. MOS 2010 Study Guide for Microsoft Word, Excel, PowerPoint, and Outlook Exams, 1<sup>st</sup> Edition, Joan Lambert, Joyce Cox, Microsoft Press

## Reference Books:

1. IT Essentials PC Hardware and Software Companion Guide, CICSO Networking Academy
2. Network Your Computer & Devices Step by Step 1st Edition, Ciprian Rusen, Microsoft Press
3. Troubleshooting, Maintaining & Repairing PCs, 5<sup>th</sup> Edition, Bigelow, TMH
4. Introduction to computers, Peter Norton, 6/e, Mc Graw Hill

## Course Outcomes:

At the end of the course, the student will be able to

Blooms Level of Learning

- |   |        |
|---|--------|
| 1. Apply wood working skills in real world applications.  | L3     |
| 2. Build different parts with metal sheets used in various appliances.  | L3     |
| 3. Employ fitting operations in various assemblies.   | L3     |
| 4. Execute basic electrical engineering knowledge for house wiring practice.  | L3     |
| 5. Identify various operations and its applications from the demonstration.   | L3     |
| 6. Recognize the peripherals of a computer, perform assembling and disassembling of various components of a computer.   | L1, L3 |
| 7. Describe and perform installation and un-installation of Windows and Linux operating systems and also perform troubleshooting of various hardware and software components. | L2, L3 |
| 8. Use Web browsers to access Internet, Search Engines.   | L3     |
| 9. Use word processor; spread sheet, presentation and data storage tools.   | L3     |

0

**Tutorial Hours**  
0

**Practice Hours**  
3

**Credits**  
1.5

**Course Objectives:**

- To familiarize the students with the basic concepts of chemistry
- To train the students on how to handle the instruments.
- To familiarize the students with digital and instrumental methods of analysis.
- To expose the students in practical aspects of the theoretical concepts.

**List of experiments**

1. Determination of Zinc by Complexometry.
2. Estimation of active chlorine content in Bleaching powder
3. Determination of copper by Iodometry
4. Estimation of ferrous iron by Dichrometry
5. Preparation of Phenol-Formaldehyde resin
6. Determination of Fe (II) in Mohr's salt by potentiometric method
7. Determination of chromium (VI) in potassium dichromate
8. Estimation of mixture of acids by conductometric titration
9. Determination of strength of an acid by pH metric method
10. Determination of viscosity of a liquid by Redwood Viscometer-1
11. Determination of functional groups in the given organic compound
12. Separation of components of a sample by Thin layer chromatography

**Prescribed Textbooks:**

1. J. Mendham, R.C Denney, J.D Barnes, M. Thomas, B. Sivasankar Vogel's Quantitative Chemical Analysis 6/e, Pearson publishers, 2009.
2. N.K Bhasin and Sudha Rani Laboratory Manual on Engineering Chemistry 3/e, Dhanpat Rai Publishing Company 2009.

**Course Outcomes:**

At the end of the course, the student will be able to

Blooms Level of  
Learning

- |  |    |
|--|----|
| 1. Operate instruments such as pH meter, conductivity meter, viscometer and potentiometer. | L3 |
| 2. estimate Zn, Cr, Fe, Cu and other functional groups in various samples                  | L2 |
| 3. determine physical properties of liquids and synthesize polymers and nanomaterials      | L3 |

Electronics and Communication Engineering  
**ANNAMACHARYA INSTITUTE OF TECHNOLOGY AND SCIENCES RAJAMPET**  
(An Autonomous Institution)

**Title of the Course** Communicative English Lab

**Category** HSMC

**Couse Code** 20AC25L

**Year** I B. Tech.  
**Semester** II Semester  
**Branch** ECE & EEE

**Lecture Hours**  
0

**Tutorial Hours**  
0

**Practice Hours**  
3

**Credits**  
1.5

**Course Objectives:**

- To learn better English pronunciation
- To use language effectively in everyday conversations
- To make formal oral presentations using effective strategies in professional life
